THE TIDE TABLES on the foregoing pages have been deduced from formulæ, furnished by the laborious investigations of the Marquis de la Place, on the theory of the Tides; and as each calculation has been separately checked, and other means used to avoid error, their accuracy may be confidently depended upon. When strong westerly winds, however, prevail for any length of time in the basin of the Atlantic Ocean, they sensibly affect the tides; while other causes combine to produce small irregularities, which no ingenuity nor science can accurately predict.

To find the times of high water at other places in Great Britain and Ireland, see the *General Tide Table* in the fourth part of the book.

The Tables are expressed in *mean time*, or that shewn by a properly regulated clock or watch.

EXPLANATORY NOTES.

I. This mark—h. occurring very frequently in the Alphabetical arrangement, indicates that the conjoined address is the *private residence* of the individual.

II. The word “Mr,” or “Esq.” placed before or after the name of any merchant or tradesman in the District Arrangement, also indicates that the conjoined address is the *private residence* of the individual.

III. As there are some Streets of the same name in Edinburgh, Leith, Portobello, and Musselburgh—as, for instance, Charlotte street, Hope street, St Andrew street, and some others, the word Leith, Portobello, or Musselburgh, is invariably added, *unless* Edinburgh be the place intended.

IV. To find any place in the Map see the General Index, in which, opposite to the name of every street, there is a *number*. Then find the *same number* in the *map margin*; and, by passing your finger in a straight line from it to *St Andrew Square*, you will *touch* the place you are seeking.

V. Map boundaries. The City & Leith, as defined by the Reform Bill, are surrounded by a scarlet line.

GRAY'S

ANNUAL DIRECTORY.

PART FOURTH.

LISTS, TABLES, AND A VARIETY OF MISCELLANEOUS INFORMATION.

GENERAL TIDE TABLE.

To ascertain the time of High Water on any given day, morning or evening, at any of the following places, find *the corresponding tide* in the table entitled "High Water at Leith," at the beginning of the book, and add to, or subtract from, the same, the number of hours and minutes below mentioned; according as the tide at the place you refer to may be later or earlier than it is at Leith. For example, referring to the Tide Table for Leith, we find that the time of high water at Leith on the morning of the first of January, 1835, will be at 24 minutes before 4 o'clock. The time of high water at London being 13 minutes earlier than at Leith, the tide at London on that morning will consequently occur at 23 minutes after Three.

SCALES OF CHARGES FOR ADVERTISING

IN THE EDINBURGH, LEITH, GLASGOW, AND NORTH BRITISH COMMERCIAL AND LITERARY ADVERTISER ;
 AND IN GRAY'S MONTHLY RECORD.

THE EDINBURGH, LEITH, AND GLASGOW ADVERTISER, which is sent weekly by its publishers, to upwards of Ten Thousand principal firms, individuals, and public rooms, was established in the year 1826, with the view of concentrating the advertisements of Edinburgh and Glasgow, and, as far as possible, those of North Britain generally into a single channel. The inducements presented to advertisers were an overwhelming circulation, as compared with any other advertising papers north of the Tweed; and extreme moderation in the charges for advertising, when compared with the publicity given, either *locally* in and near Edinburgh and Glasgow, or *generally* throughout Scotland, as well as in London, Liverpool, Dublin, and many of the principal English towns. A steady and progressive increase of advertisements for nearly eight successive years—now frequently *trebling* and *quadrupling* in number those contained in one number of any other Edinburgh paper—has completely established the vast superiority of this system of advertising.

GRAY'S MONTHLY RECORD, or Companion to the North British Advertiser, owes its existence to the non-existence of any law to prevent newspapers being published on unstamped paper, if issued only once a-month, or at longer periods. The proprietors of the North British Advertiser have availed themselves of this state of the law to publish a Monthly Index to all the advertisements passing through the North British Advertiser; as also, to afford, upon the same sheet, a very numerous local circulation, at an exceedingly moderate charge, to such advertisements as may either be repeated therein from the North British Advertiser, or inserted only in itself.—7, North Bank street, 1st May, 1834.

OBSERVE—

1st, That by "*Cash*" is meant—never entered in a book to the debit of the advertiser; and that the "*Credit*" charge is affixed to all advertisements which may be so entered, *for however short a period*.

2d, That the lines of both papers contain, on an average, about *ten words each*, being considerably more words than are contained, in one line, in papers generally.

3d, That whatever occupies the space of a line is charged as a line; and, consequently, that in writing advertisements, with a view to economy, care should be taken neither unnecessarily to divide the matter into numerous paragraphs, nor to indulge the fancy for displaying titles; by which three or four lines are sometimes occupied with but little more than as many words.

4th, That dealers of every description, and public companies, such as insurance companies and others, who are disposed to keep their names constantly before the public, are dealt with on liberal terms, on condition of their giving an order for inserting advertisements for twelve successive months, or even for six months certain. And advertisements of *extraordinary length*, such as the proceedings and resolutions of public bodies, lengthy catalogues of books, &c. are also objects of special contract.

DIRECTIONS FOR THE RECOVERY OF PERSONS APPARENTLY DROWNED.

PRECAUTIONARY.—Lose no time—avoid all rough usage of the body—never hold it up by the feet—do not roll it on casks—do not rub it with salt or spirits—do not inject tobacco smoke, or infusion of tobacco.

RESTORATIVE.—Send quickly for medical assistance, but do not delay the following means:

I. Convey the body carefully, with the head and shoulders supported in a raised position, to the nearest house.

II. Strip the body and rub it dry; then wrap it in hot blankets, and place it in a warm bed in a warm chamber. A child may be placed between two persons in a warm bed.

III. Wipe and cleanse the mouth and nostrils.

IV. In order to restore the natural warmth of the body, move a heated, covered, warming-pan, over the back and spine. Then put bladders or bottles of hot water, or heated bricks, to the pit of the stomach, the armpits, between the thighs, and to the soles of the feet. Then foment the body with hot flannels; but, if possible, immerse it in a warm bath, as hot as the hand can bear without pain, as this is preferable to the other means for restoring warmth. Rub the body briskly with the hand; but do not suspend the use of the aforesaid means at the same time.

V. In order to restore breathing, introduce the pipe of a common bellows (where the apparatus of the Society is not at hand) into one nostril, carefully closing the other one and the mouth; at the same time drawing downwards and pushing gently backwards, the upper part of the windpipe, to allow a more free admission of air. Blow the bellows gently, in order to inflate the lungs, till the breast be a little raised; the mouth and nostrils should then be set free, and a moderate pressure made with the hand upon the chest. Repeat this process till life appears.

VI. Electricity to be employed early by a Medical Assistant.

VII. Inject into the stomach, by means of an elastic tube and syringe, a tumblers of warm brandy and water, or wine and water.

VIII. Apply sal volatile or hartshorn to the nostrils.

The above treatment is to be persevered in for three or four hours. It is not to be supposed that persons are irrecoverable, because life does not soon make its appearance.

ON RESTORATION TO LIFE.—A tea-spoonful of warm water should be given; and if the power of swallowing be returned, small quantities of warm wine, or warm brandy and water, should be given. The patient should be kept in bed, and a disposition to sleep encouraged. Great care is also requisite to maintain the restored vital actions, and, at the same time, to prevent undue excitement.

RECEIVING HOUSES.—Broad Wynd, Leith, No. 17, the Society's Rooms.—Salamander street, Alex. Macfarlane.—Dock gates, George Cameron.—Albany street, Leith. D. Beveridge, grocer.—Newhaven, Peacock and Chain Pier Inns.—Water of Leith, John McLeod, spirit dealer.—Canonmills, William Laurie, spirit dealer.

POST OFFICE REGULATIONS.

SIR EDWARD S. LEES, having refused to allow the Edinburgh Post Office lists to be corrected for insertion in this Directory, for the present year; and His Grace the Duke of Richmond, the Post Master General, having refused to "interfere" in the matter, they are unavoidably omitted; as they cannot be *correctly* obtained from any place whatever, except the Post Office.

In the form of a pamphlet, they will, however, be reprinted *verbatim* from the Post Office Directory, so soon as that work may be published; together with all the correspondence that has taken place upon the subject; and the said pamphlet will be sent gratui-

tously to every buyer of a copy of this Directory, with the least possible delay.

Above two thousand copies of this book, will pass immediately on publication, into the hands of residents in Edinburgh. Suppose each volume to be of use to hut ten persons, *twenty thousand* of the principal professional and mercantile inhabitants of this city, have thus been refused by Sir Edward S. Lees, access to the laws and regulations of the *public* establishment, of which he is the head: which laws and regulations the public are held by law to know and to obey; unless, against their will, they continue to purchase the Post Office Directory; which, it is confessed even by its own publishers, has, for a period of twenty eight years, been little better than an apology for taxing the public to the amount of £700 per annum, three thousand five hundred books—the usual number printed—at four shillings each, amounting to that sum.

K. Treasurer avails himself of this opportunity of returning his most grateful acknowledgments to his Customers for their support, and the unvaried kindness they have shewn him for the period of 35 years, during which he has carried on Business in Edinburgh; and begs to assure them that the utmost attention will always be paid both to the *fitting and tastefully making up* of every article of Clothing, as also to the time of its delivery.

JUNE, 1834.

FINEST SODA & MAGNESIA WATERS.

H. C. BAILDON, Successor to, and for six years Manager for **T. BUTLER and Co. Chemists**, 73, PRINCE STREET, Edinburgh, begs to inform the numerous Friends of the Establishment and the Public, that he has now brought the manufacture of **SODA and MAGNESIA WATERS** to the highest state of perfection, by means of a most powerful machine, which, *with a very important improvement just added*, enables him to compress a much larger quantity of fixed air into these Waters than was previously practicable. This improved apparatus he will with great pleasure shew to any gentleman. And in order that the drinkers of these beverages may obtain them in the greatest perfection, **H. C. B.** has just erected a fountain, by which he is enabled to produce a very great degree of cold in the hottest summer months, upon the principle—that of evaporation—practised in the tropical climates.

This mode is quite effectual in reducing the temperature of Soda and Magnesia Waters, the extraordinary efficacy of which in allaying thirst, and correcting acidity, is now universally acknowledged; and the rapidly increasing demand for them since the reduction in price, makes it important that they should be supplied of the very best quality. Quantities of one dozen bottles and upwards, carefully packed, are sent to any part of the country.

THE EDINBURGH MEDICAL HALL.

No. 73, PRINCE'S STREET,
(Exactly opposite the Earthen Mound.)

H. C. BAILDON, having purchased THE MEDICAL HALL, from Messrs Butler and Co. in August, 1833, he has endeavoured to give the utmost publicity to the following particulars.

"I. That for the previous six years he was the personal Manager of the Medical Hall; and the best evidence that can be adduced of the success which attended his management is, that during the whole period aforesaid, the business steadily and extensively increased, both from the patronage of the Members of the Medical Profession, and of the Public generally.

"II. That having thus entered upon the Proprietary of the Medical Hall, under the great advantage of being personally known to its numerous friends, and with the most complete practical knowledge of the business in all its departments, he confidently trusts that the same means which he has hitherto employed will be productive of the same result; and that, by the closest personal attention to business, by the careful selection of the finest and freshest drugs, by regularity and promptitude in the execution of orders, and by the utmost care and accuracy in the dispensing department—in which none but himself and his most experienced assistants are ever employed—he may be enabled still farther to enlarge the claims of his Establishment on the notice and patronage of the public."

Nearly twelve months having now elapsed since the Medical Hall came into his own hands, H. C. BAILDON, begs most respectfully and gratefully to return his sincere thanks to the Profession, and the Public generally, for the large increase of patronage he has already received, an increase greater and more rapid, than that experienced during any period of equal duration, since the business was commenced.

MEDICAL HALL, June 1, 1834.

EDINBURGH AND DALKEITH RAILWAY.
TO CONSUMERS OF COAL.

THE GREAT DEPOT of the Edinburgh and Dalkeith Railway contains Sir John Hope's Coal, the Marquis of Lothian's Coal, the Edmonstone Coal, and the Arniston Coal, so that all the best kinds of Coal in the country, and every variety, are to be had there. About five acres of the Depot are occupied with the private Store-yards of the Great Coal Proprietors, and the vicinity of these Store-yards to the City is of immense importance to the inhabitants, because the consumer may obtain his Coal directly from the Coal Proprietor, whose interest it is that the Coal should be in a pure state. The Coal sent to the Railway Depot is carefully selected with the hand, and freed from the coarser parts and the dross; waggon loads are frequently returned from the Depot Stores to the Collieries, as unfit to be sold in that great market, where competition makes character and quality so essential. That refuse is bought at the Coal Hills at a low price by those dealers whose practices deter them from the Railway Depot; they mix it with some better Coal, and sell the whole as the best of its kind.

The Coal Agents, or Merchants, who hold Offices from the Railway Company, are very correct in their

RAILWAY DEPOT *continued.*

dealings. They have, however, no Coal-yards attached to their Offices, so that they have not the power, though they had the desire, to mix and adulterate the Coal. They send it, as ordered, directly from the Stores of the Coal Proprietors; and the weight and quality, as compared with the account or invoice sent to the consumer, are checked by an officer appointed by the Railway Company; and the carters are watched through the narrow streets by one of the Company's constables.

Consumers of Coals should attend to the following directions; they have been published in all the papers, yet very many, especially housekeepers and servants, are paying no attention to them:—

1st, Never receive a cart of Coals without the certificate of the Railway Company's Weigher, his name is ROBERT GIBB, and if he should be changed, notice shall be given by advertisement.

2dly, Attend to the hour marked in the Certificate, and if more than an hour after that has elapsed before the Coals are delivered, reject them, for the carter may have been disposing of a part of his load.

3dly, Always keep or destroy the Weigher's certificate for if it remain with the carter, he may use it on the same day a second time, to pass another cart of Coals of inferior weight or quality.

4thly, Any person receiving a cart of Railway Coal may assure himself of its weight and quality, by calling at the Depot, and examining the entry in the Weigher's book, or by writing a note to the Manager of the Railway, mentioning the weight and kind of Coal he had ordered—also the name upon the cart, and the hour of departure contained in the weigher's certificate. The consumer has thus a complete check upon the coal merchant or agent whom he employs, and the coal merchant has an equal check upon the carter.

The respectable coal merchant has a great advantage by supplying his customers from the Stores of the Railway Depot, for he saves the expense of keeping a private Store-yard, and of storing, selecting, and loading; and he can always obtain testimony of the honesty of his dealings.

Those who are not acquainted with any Coal Merchant on whom they can depend, may address orders for Coal to the Railway Office, St Leonard's Depot, and these shall be given to respectable Agents for execution.

The Railway Coaches to Dalkeith and Fisherrow, depart from St Leonard's Depot, at eight, ten, twelve, two, four, six and $\frac{1}{2}$ past eight o'clock.

D. RANKINE,

Manager for the Railway Company.

Railway Office, June 1834.

SCIENTIFIC IMPROVEMENT IN ARTIFICIAL TEETH.

DR LAWRIE, SURGEON AND DENTIST,

begs to intimate his removal from St James's Square, to No. 3 ROSE COURT, GEORGE STREET, where he continues to carry on every branch of the Dentist profession, on the most improved and scientific principles. He would particularly solicit attention to his superior method of fitting Artificial Teeth, by means of *Atmospheric pressure* alone, without requiring the aid of *Clasps* or *Springs* for their support. It is owing to the simplicity and efficacy of this principle that the operation is unattended with pain, or any of the troublesome and injurious consequences which have been hitherto considered as inseparable from the use of Artificial Teeth: So that this method may be said to form an antidote to "*The miseries of Artificial Teeth*."

Dr L. therefore, invites those who may be labouring under the loss of teeth, to avail themselves of this sure and easy method of having them replaced, either with *Natural, Mineral, or Artificial Teeth*, which he fits, from one to a complete set, in so accurate a manner as not to be distinguished from nature. Teeth *Sealed* and all injurious substances completely removed, without injuring the enamel.

* See TAIT'S Magazine for January 1834.

DENTAL SURGERY continued.

THIS INCORPORATION is composed of a numerous, wealthy, and influential body of Proprietors; and affords unquestionable security to the public from the magnitude of its capital—a large proportion of which is invested in Government or real securities. By conducting its operations on an extensive scale, it is enabled to equalize those vicissitudes which may arise from the influence of local causes; and, from the success which has hitherto attended this National Establishment, it is now permanently placed on a secure basis. A small annual contribution will secure property, real or personal, from loss or damage by FIRE; and by the same means, all those calamitous consequences may be obviated which so frequently arise from the uncertainty of human LIFE, and the many accidents to which it is daily exposed.

FIRE DEPARTMENT.

Property, real and personal, of every description, may be insured on the most advantageous terms; common insurances of the first class at the reduced rates, and property involving more than ordinary hazard, at rates of premium commensurate with the value of the risks.

LIFE DEPARTMENT.

It has been the anxious wish of the Directors of this Incorporation to ascertain how far the results of experience might be rendered beneficial to the public, without giving any reason to suppose that they were actuated by a dangerous spirit of competition. The Tables of Rates, specimens of which are here exhibited, have been calculated expressly for this Institution, and are deduced, on scientific principles, from the Mean Standard Table of the Decrements of human Life in Great Britain for 1824, as published by the late Dr Thomas Young, in the Philosophical Transactions of the Royal Society of London.

PARTICIPATIONS IN PROFITS.

TWO-THIRDS of the profits are allotted at regular periods to the insured, *Without being subject to any deduction for charges of management*. The first division will be made on 1st January, 1842. The

SCOTTISH UNION *continued.*

remaining one-third will be reserved by the Incorporation as a compensation for undertaking the whole expense of management, and for the security afforded by their capital against all possible contingencies.

The profit will be divided on the most equitable principles, in the proportion that each surviving person has contributed to the profit Fund.

A reversionary sum, equivalent to the present bonus, will be added to the original sum insured; or a corresponding reduction will be made from the future annual premiums.

The *general accounts* of the Incorporation are patent to the Insured, but the *individual transactions* themselves are held as strictly private and confidential.

A SPECIMEN OF THE RATES.

Annual premium for the whole life, with participation of profits, *without any liability for charges of Management, for insuring £100.*

Age 30 . . . £2 9 11 || Age 40 . . . £3 5 0 || Age 50 . . . £4 7 9

REDUCED RATES. NO PROFITS.

To facilitate Loan transactions, a reduced scale of rates has been adopted, which will be found particularly favourable to the Insured, especially for young and middle-aged persons.

Age 30 . . . £2 6 1 || Age 50 . . . £4 1 7
40 . . . 3 0 2 || 60 . . . 6 7 10

Moderate rates are demanded for Insurance against the contingencies of foreign climates, Military or Naval service, and voyages to distant countries; also for healthy persons above the age of 60, and for persons of all ages, afflicted with gout, asthma, rupture, or other serious maladies.

Each policy issued by the Company makes it imperative on the Directors, in the event of doubts or difficulties arising, to submit all such disputes or questions to arbitration; while, for the convenience of persons resident in England or Ireland, it shall be competent for the Insured to sue the Corporation, if necessary, by service of the proper writ upon the Company's agent at the place where the Insurance was effected.

Prospectus, detailing more particularly the various advantages offered by this Incorporation to the public, with Tables of the Rates both for Life and Fire Insurance, may be obtained by applying at their Office, No. 47 George Street, Edinburgh, or at any of their authorized Agents throughout the Empire.

THIS INCORPORATION divides,

Septennially, the whole Profits amongst the insured, who are guaranteed from responsibility. A return of Nine per Cent. was made on the Premiums received from Candlemas 1825 to Candlemas 1832; and this notwithstanding a more than average amount of Losses during that period.

The business of the Society has been gradually and steadily increasing since the adoption of the present system of dividing the Profits; and as the losses during the current seven years will not, in all probability, be above an average, the Assured have reason to anticipate a still more favourable result at the next investigation.

All Town Risks of the First Class,—Dwelling-houses situated in the country,—and Farm Steadings, are taken as Common Insurances, at 1s. 6d.

THIS COMPANY continues to effect

Life Insurances, the Premiums on which may be paid quarterly, half-yearly, or annually, at the option of the Insured; to grant Annuities on single or joint lives; and to advance money on annuity secured on Free-hold, Copy-hold, or Long-Lease-hold property, or on money in the Funds.

The Assured with this Company participate periodically in the profits.

The Bonus declared on the 3d of July, 1831, attaches to all Policies effected on or before the 31st December, 1829.

NORWICH UNION LIFE AND FIRE INSURANCE SOCIETIES.

LIFE SOCIETY.

ESTABLISHED 1808.

IN considering the numerous Establishments, formed and forming, for carrying on the business of Life Insurance, the public attention is called to the following leading points relative to this Establishment:—

First,—That it ranks, in point of business, above every other Life Insurance Office, except the Equitable Society of Bridge Street, Blackfriars, London.

Second,—That from the great extent of its business, the advantage of an average decrement of life, so essential to the prosperity of a Life Insurance Office, is secured.

Third,—The security of an accumulated fund of upwards of One Million, Four Hundred and Fifty Thousand Pounds, in addition to an Annual Income of Two Hundred and Fifty Thousand per annum.

Fourth,—The distribution of the whole profit amongst the parties insured, which at June 1816, was declared to be 20 per cent, at July 1823, 24 per cent, and at July 1830, 25 per cent, making in all 69 per cent.

Fifth,—The reduction of its rates, which is equivalent to an annual bonus.

Sixth,—The insured are permitted to go in steam or other decked vessels, to and from any part of the United Kingdom; and in time of peace, to and from any part of the Continent, situate between the Elbe and Brest, without being required to pay any additional premium, or procure a license from the Directors.

Seventh,—The Policies of the Society, may also be at any time sold or mortgaged; *and no notice of such transactions is required to be given at the office*,—such negotiations usually requiring the greatest delicacy and secrecy.

FIRE SOCIETY.

THIS SOCIETY WAS ORIGINALLY ESTABLISHED IN 1797.

It is a part of the constitution of the Society, that losses may be substantiated before local Committees, —a system which greatly facilitates the prompt settlement of claims.

The Fire Society is wholly distinct from the Life.

In proof of the public confidence in the principles and conduct of this Establishment, it may be sufficient to state, that the duty for the year ending on the 25th March last, amounted to £68,356, 18s. 2d.; and that the total business of the Society now exceeds FORTY-EIGHT MILLIONS.

It is provided by the constitution of the Society, *that the insured shall be free from all responsibility*; and, to guarantee the engagements of the office, a fund of £550,000 has been subscribed by a numerous and opulent proprietary.

The Edinburgh Life Assurance Company was originally formed exclusively on what is known as the *Participation Principle*, according to which, all persons assuring for the term of life, whose Policies shall have existed for five years, are entitled to participate in the profits of the Company; but as, in many cases, the object of the Party assuring is to secure a *fixed* sum, by payment of a low Premium, without regard to additions, the original plan of the Company has been extended, by adopting also a Table of Rates *without participation*.

The large subscribed Capital, and the numerous and responsible body of Proprietors, afford unquestionable security to Assurers, who are thereby, as well as under the terms of the Policies, effectually protected from all liability,—while, from two-thirds of the Profits being allotted to those assured on the Participation scheme, they enjoy all the advantages of the Mutual Assurance System.

The Company effect Assurances for periods short of the whole of life,—and also on *joint lives*,—and on the *survivorship of two or more lives*. The Premiums in all of these cases, as well as on Single Lives, may be paid in one sum at the outset, or periodically for a limited number of years only, in place of annually during the whole continuance of the Assurance. The rates corresponding with those different modes, may be learned on application at the Office.

The Directors purchase, at a fair price, Policies for the whole Term of Life, which shall have subsisted for three years, if the Holders should wish to discontinue the Assurance. Policies may be sold or transferred.

Attendance is given daily at the Office, where every information may be obtained:—The *strictest secrecy* is observed in regard to all business transacted with the company.

OBSERVATIONS.

The principles upon which this Institution is founded have been adopted after a mature investigation of the practice of other Offices, and will be found to combine advantages not hitherto offered by any other Assurance Company having a Subscribed Capital.

The Capital, subscribed by a numerous and respectable Proprietary throughout the Empire, affords security for prompt and certain indemnity, without the responsibility attaching to Societies for mutual assurance.

The Company are bound, by the Deed of Settlement, to refer all disputed claims (where no fraud is suspected) to the decision of arbitrators, if required by the Assured.

Life Policies of this Society may be sold, transferred, or mortgaged, without any notice being given at the Office; and in all minor articles the utmost liberality will be afforded to the Public, consistently with the security of the Company.

FIRE DEPARTMENT.

The Premiums charged by this Company on the Three ordinary Classes of Fire Insurance are (with certain exceptions) as follow, viz.

1st Class,	1s. 6d.	per cent per annum,	<i>formerly</i>	2s.
2d do.	2s. 6d.	.	.	3s.
3d do.	4s. 6d.	.	.	5s.

Other Risks not falling within the above Classes, may be insured by Special Agreement.

The allowance of 10 per cent, which has been made on the Premiums paid on Policies of seven years' standing, is the surest proof of the unprecedented success of this Institution.

LIFE DEPARTMENT.

Independent of a reduced rate of Premium, as compared with other offices having a subscribed Capital, Insurers for the whole term of life are entitled, at the end of seven years, to participate in the Profits with the original Subscribers, either by an addition made to the amount of their Policies, or by a reduction of their future Annual Premiums, at the option of the Insurers. The Additions so allowed at the last Septennial Division amounted, on an average, to more than one per cent per annum on the sums insured.

Persons insured in this Office are allowed to pass by sea from one part of the United Kingdom to another; and also in time of peace, to pass in decked vessels or steam-boats, from British to Foreign Ports, between the Texel and Brest (both inclusive,) without extra premium, or special leave of the Directors, as is usually required.

No additional premium required from Military Men, unless when called into actual service.

No charge made for Entrance Money or Admission Fees; and none for Policies beyond the cost of Stamp.

THE SCOTTISH EQUITABLE LIFE ASSURANCE SOCIETY is formed upon principles calculated to afford the greatest possible benefits to the assured. It is a Mutual Assurance Society, in which the whole profits belong to, and are periodically divisible amongst the assured. In this respect it differs essentially from a Proprietary Company. In the latter, the profits are in some cases wholly, and in all others partly, divided amongst the Proprietors, who, as Partners, have nothing in common with those who effect assurance with the Company. When the lives are carefully selected, and the revenues prudently invested, experience has demonstrated that those profits are greatly beyond what is understood by such as are not intimately conversant with the subject. The numerous Proprietary Life Companies which have arisen,—the exertions made by them to procure business,—the dividends they have been enabled to pay to the Proprietors,—and the value of their stock, demonstrate the extent of their profits. Any healthy person, therefore, who finds it expedient to have his life assured, and who resorts to a Proprietary Company, just gives away his share of profits; and he does so without any corresponding advantage whatsoever. For though Proprietary Companies hold it out as an inducement to join them, that they secure to the assured the sum specified in the Policy, whether profit be made or not, this is merely a nominal, but is no real security—the fact being, that in every established Life Office, large profits have arisen. Such has been the result, partly because human life is ascertained to be of much greater duration than is assumed in those calculations, on which all well-conducted Life Institutions have cautiously and very properly proceeded, and partly because money can, by transactions in redeemable annuity, and otherwise, be improved to greater advantage than the rate of interest assumed in such calculations. No Proprietary Company, therefore, can possibly afford so great advantages as Mutual Assurance Societies do; for such Societies, by dividing the whole profits amongst the Policy Holders, assure the greatest possible sum at the lowest possible rate. In other words, they assure at prime cost. Accordingly, if it were said of any Mutual Assurance Society, that its rates are too high, it is an obvious answer—that granting they are so, it does not form a good reason for joining a Proprietary Company in preference to a Society, because all monies beyond what are absolutely indispensable for securing payment of the sums assured, are returned or compensated to the Contributors, either by corresponding additions to the sums specified in the Policies, or by making a corresponding diminution of the future Annual Contributions or Premiums. The great practical effect, in short, of the Premiums being somewhat beyond the risk, is to create an additional guarantee for the stability of the Institution.

SCOTTISH EQUITABLE *continued.*

The London Equitable, on the exact model of which the Scottish Equitable is formed, is well known throughout the Empire; and the profits which that admirable Institution has divided, are familiar to every one at all acquainted with Life Assurance. In some cases, the bonuses or divisions of profit have extended to more than four times the sum assured—an immense advantage, the whole or the greater portion of which has been lost by those who have resorted to Proprietary Companies.

The Premiums or Contributions required by the Scottish Equitable are somewhat lower than those of the London Equitable. It is not, however, on the lowness of the Premiums required that the Scottish Equitable Life Assurance Society puts forth and rests its claim to support. As has already been said, it is of small, or rather it is of no importance to the Members of a Mutual Assurance Society, that the Premiums or Contributions are somewhat more than adequate to the payment of the sums assured, seeing that, to the Members alone, all the surplus is appropriated. The claim of the Society to a decided preference, therefore, is founded on the irrefragable fact, that from the very nature of the Institution, as it stands, no Company, or other Institution on a different principle, can warrantably offer to the assured so great advantage as it does.

The utmost care is taken in the Selection of Lives,—the Establishment is economically conducted,—the funds are profitably invested,—and a large surplus has already been realized, which, and the profits to be made in future years, will be divided periodically amongst the Policy Holders, reserving a portion thereof to meet contingencies, in terms of the Society's Deed of Constitution. Every facility and accommodation, which any other Life Institution can safely afford, will be given by this Society.

The large accumulated Capital and Annual Revenue of this Institution, (which, as a Life Assurance Association, is the oldest and most extensive in point of business in Scotland) enables the Directors to offer to the public the full advantages arising from the principle of its constitution, combined with the utmost measure of SECURITY.

The great value of the principle of mutual contributionship, or, as it is generally termed, MUTUAL ASSURANCE, on which this Society is founded, is now well known. By the operation of this principle, taken in connexion with the careful selection of lives, and an economical management of the Society's business, it is evident that the advantages of Life Assurance are secured to their utmost possible extent. Indeed, they only require to be known and understood to be fully appreciated; and so rapid, accordingly, has been the growth of this Society, that, during the last fifteen years, the annual revenue has increased from £2300, to upwards of EIGHTY THOUSAND POUNDS STERLING *per annum*; and the accumulated Fund from £3000 to nearly FOUR HUNDRED THOUSAND POUNDS STERLING; and both are in a state of steady and rapid increase.

The President, Vice-Presidents, Trustees, and Directors, are all personally interested in the Society, and must, in terms of the articles of constitution, be members of more than three years' standing.

The last periodical investigation of the Society's affairs took place at 31st December, 1831, when large additions were declared to the Assurances entitled thereto. In order to show the value of the additions made out of the Surplus Fund, the following particulars are given of the claim arising under a Policy opened previous to 1st January, 1820, if emerging in the current year by the death of the party assured:—

Sum originally Assured,	£1000	0	0
Vested additions up to 31st December, 1831,	392	6	0

£1392 6 0

Contingent prospective additions applying to the annual premiums paid for 1832, 1833 & 1834,	62	13	0
--	----	----	---

Total sum payable,	£1454	19	0
--------------------	-------	----	---

The ordinary Court of Directors meet weekly for the purpose of receiving and deciding on applications or Assurance, which are now granted to the extent of £5000, on approved single or joint lives.

Tables of rates of Premium, and every necessary information, will be readily communicated on application at the Society's Office

THIS SOCIETY

Has for its basis *economy combined with security*—the terms of Assurance for Young and Middle-Aged Lives being much *lower than those of any other Office which gives a bonus to the Assured*; and a full statement of its affairs is annually made to the Share-holders and Policy-holders, who have a control over the Society.

Three-fourths of the profits are now divided among those Assured on an equable scale, for the whole term of life, after the Policies shall have been in force four years; and eventually *the whole of the profits* will be so divided.

A *bonus* was declared up to the end of 1833, which gave to Policy-holders, on an average, SIXTEEN POUNDS PER CENT upon the amount of premiums paid. Persons assuring during the year 1834, will be entitled to share in the profits to be divided up to the end of 1838.

Endowments for children are granted, and Assurances on Joint Lives, Survivorships, Survivorship Annuities, as well as every species of Life contingency, at rates proportional to the nature of the risks, which are as low as possible compatible with security to the Assured.

Assurances are also effected, either by paying small premiums at first, and increasing them every five years, or by paying a high premium at first, subject to periodical abatements, and, ultimately, the payments to cease altogether. In fine, persons may be Assured in *any way* which may be best adapted to their circumstances or wishes.

Medical Referees are appointed in most cities and large towns and every information may be obtained and Prospectuses and Tables had from the Agent.

The principle upon which they commenced business was, to supply the public with the best quality of cloth at the very lowest possible price, for cash, at which the article can be produced; and the immense success which they have had hitherto, is a sufficient proof that such a principle is appreciated.

MR SPENCE, SURGEON-DENTIST, No. 50, GREAT KING STREET, respectfully begs to CAUTION those suffering from **TOOTHACHE** against the too common practice of immediately getting the teeth extracted; for he can confidently assure them that nineteen out of twenty so affected, can not only speedily be relieved from pain, but have their teeth rendered useful to them for many years thereafter. Such at least have been the result of many thousand cases which have fallen under his own care, during a PRACTICE OF TWENTY YEARS in this City, a time sufficient, he conceives, to prove its utility, and to warrant him in recommending his METHOD of STOPPING DECAYED TEETH to the attention of the public.

DEFICIENCIES of the TEETH and PALATE SUPPLIED, and every OPERATION of DENTAL SURGERY PERFORMED, on the most approved principles.

ROBERT RITCHIE, IRONMON-GER, &c. to the King and Queen, 241 HIGH STREET, and 86 GEORGE STREET, respectfully intimates that he has, for many years, devoted much attention to the improvement of STOVES, for the best means of Warming Buildings with slightly heated air. In addition to numerous satisfactory references which he has in his power to give, both of public and private Buildings warmed by his Air-stoves, wherein their decided superiority has been evinced, he can also, with satisfaction, refer to the strong testimonial he lately received from the Society of Arts for Scotland; who, in awarding him their Honorary Medal, were pleased to compliment him upon "The valuable information he had brought forward on the construction of Stoves, and proper application of heated air to the Warming and Ventilating of Buildings."

R RITCHIE has also devoted much of his attention to the consideration of the best and simplest methods of Warming Public Buildings, Dwelling Houses, and Conservatories, &c. with Steam Heat, and by the circulation of Hot Water. Satisfactory references can also be given as to his success in warming buildings by these plans.

GRAY'S EDINBURGH DIRECTORY,

SECOND PUBLICATION.

THE circumstances which gave rise to the publication of the first edition of this work were therein so fully detailed, and have otherwise been so abundantly made known to the public, that it is unnecessary, upon the present occasion, to offer any thing additional in the character of a Prospectus. Upon first attempts, however, of every kind, improvements are apt to be made; and the present instance, it is believed, will not prove to be any exception to the rule.

Smaller in bulk, but more convenient in form, a greater quantity of matter is here presented than was given in the edition of last year: and the work—though still perhaps capable of some improvement—will, it is hoped, be found equal, if not superior, to any one that has ever appeared, bearing the name of a Directory. Being, however, substantially the same as last year, little remains to be said, otherwise than to name the differences between this and the former volume; and these are chiefly as follows:—

THE POST OFFICE LISTS.—Although most distinctly promised in the prospectus, these are altogether omitted!! The explanation is, that they were promised in the prospectus *because* SIR EDWARD S. LEES engaged in writing to correct them for insertion in my Directory of last year; and no intimation being received of an ALTERED DETERMINATION on his part with respect to the PRESENT SEASON, it was taken for granted that he would supply the corrections this year as formerly. Eventually, however, he refused to do so; and a somewhat lengthy correspondence having been the result, the said correspondence and lists will very speedily be published together as a Supplement to the present work, and sent gratis, to all the subscribers for, and buyers of it. And whatever, in the way of comment, it is deemed necessary to say upon the subject, will be reserved for that occasion. See also a note respecting these lists in the part of the Directory wherein they should have appeared, page 341.

CHANGE OF FORM.—It was a good deal objected to this work last year, that it was too bulky and ponderous. To remedy this inconvenience without diminishing in the smallest degree the utility of the book in any particular, the page has been a little enlarged, a somewhat smaller type has been used, and three columns to the page are given instead of two; by which means the thickness of the book has been reduced by nearly a third; thereby rendering it more compact, manageable and convenient.

CHANGES IN THE CONTENTS.—Some unimportant lists have this year been cancelled, whilst others of considerable utility have been added. The separate list of the Nobility and Gentry has been relinquished as an *Impracticability*. There are too few persons of Title to make it worth while to give a separate list of them; and it is found by experience, that the words "Gentry" and "Esquire" have ceased, in these degenerate days to have any meaning. The word "Lodgings" too is another equivocal adopted by many persons "who have no other business upon earth;" and, in a practical point of view, as the head of a classified list, it is utterly useless. Does any one want lodgings? Let him think upon the part of the town he would prefer, and then let him turn to the approved district in the second part of this book, and by casting his eye down a couple of columns, he will there find lodgings in abundance.

Another list omitted in the *classified* department, is that of persons who denominate themselves, simply "Writers." The term "writer" is here used almost synonymously with that of "lawyer" in England; the corporate bodies of writers, however, consist solely of Writers to the Signet and Solicitors, both of whom are classified. But the term "writer," not a member of the aforesaid societies, being open to any one who may think proper to adopt it, and being adopted, in very numerous instances, by persons who can only with difficulty write their own names, it also has ceased to be used here as a title for any class of persons collectively.

Another, and the last relinquishment this year, is that of the mark (*) proposed to be annexed to the names of persons entitled to vote at the election of a member of Parliament. The truth is, that on an average, *not one person in twenty* seems disposed to answer the question whether he is entitled to vote or not; and the mark is therefore abandoned, as a thing of little or no interest. For all the practical purposes of an election the book, however, answers quite well; for, presenting, as it does, the entire City divided into districts, the candidates are enabled to perambulate it with the utmost system and facility.

In place of the foregoing lists, others of *unquestionable utility* have been given. A very complete list of Hackney coach fares, consisting of nearly ten pages, will be found commencing at page 354. The carriers' names, much in request amongst tradesmen, are added to the conveyance department. The interest table has been revised and corrected by a professional accountant, Mr James Trotter. Numerous additions have been made to, and more complete designations are given in, the General List of Public Offices. A more full and correct table of Foreign Coins has been substituted for that of last year; and the few recently erected buildings have been added to the map. In short, the utmost care has been taken to render the Work, in every respect, as complete and accurate as possible.

PRINTING.—As it will be observed that the printing of this volume has not been executed in the same office as the last, it is proper to mention, that tempted by a very pretty type, never before used, but more especially by a very low estimate, I was induced to give the preference this year to a gentleman who has not hitherto been very celebrated as a book printer. For the printing, however, the work will speak for itself; and I think that they will be somewhat over-fastidious who will object to the quality of it. In all other respects, I must do Mr James Colston the justice to say, that he has performed his part with the utmost attention and promptitude, and in every particular to my entire satisfaction. The first half sheet, however, was executed, as last year, by Mr Shortrede, the excellence of whose printing it would be somewhat superfluous to compliment.

Proffering my very sincere thanks to the numerous subscribers for this work; and assuring them, in the words of all advertisements, that my best endeavours will ever be used to merit a continuance of their favours, I beg to subscribe myself

Their most obedient humble Servant,

JOHN GRAY,

One of the Proprietors of the North British Advertiser.

COFFEE ROASTING & SIEVE
Combination

THE ENGRAVING on the foregoing page will serve as a sort of glance into W. Law's Coffee Roasting Shop. The apartment is 50 feet long, 16 feet broad, and 24 feet high. The Steam Boiler stands in the right corner, as in the plate, the Engine next, and the four Roasters connected with it extend the whole length of the place. Two of these Roasters contain 112lbs. each, and the other two 56lbs. each. The figure in the left corner of the plate, standing above, is an accurate drawing of one of these Roasters; partly to fill up the space, and, if possible, to convey some notion of the peculiar construction and motion of the machine. The figure in the other corner is put there for uniformity's sake, and represents the Coffee Mill used in W. Law's Shop.

It is unnecessary to enter into any lengthened detail of the rise and progress of such a Manufactory as this. Like most other things of the sort, it arose from the meekest trifle. A wish to have a Roasting Machine, with two motions in place of one, promised, in the first place, to be useful; and, in the second, to be curious, whether it were useful or not. Revolving this single idea for months,—as weak people will do with mechanical crotchets in their heads,—a method of producing these two simultaneous motions occurred one day, as if by accident. No sooner was the movement clear to the mind's eye, than a Wooden Model was set about; and as the movements were accomplished satisfactorily, the blacksmith was employed next to construct a coffee-pan on the new principle. As soon as this was tried, expectation was not only confirmed, but exalted. In the new way the work was much better done, and it was much easier doing the work. There was more temptation to push the trade, and the sale was increased rapidly. Pan after pan was ordered, improvement after improvement was effected; and, in the short space of two years, what with excellence of quality, lowness in price, and novelty in preparation, there was obtained a greater and more constant demand for coffee than had ever taken place in any one shop in the world before!!!

These facts and assertions will, of course, be called by some the mere vapours of a puff; but there are others who may be satisfied to see that W. Law does not alone entertain a favourable opinion of his Coffee Roasters; and, for this purpose, he submits the two following papers, viz.

First,—A Descriptive Account of a Model submitted to the Society of Arts, by W. Law, December 1829; and, secondly, their Report upon that Model:—

THE INVENTOR of the accompanying Model has been, for many years, a Roaster of Coffee for his own trade, performing the operation with the ordinary cylinders hitherto and yet in general use in Britain and on the Continent. He was constantly dissatisfied, however, with the partial manner in which the cylinder performed its duty, making parts of its contents black, others brown, and others all the various shades of both. This result was easily accounted for, from the fact of a cylinder only revolving on one axis; and though it threw the coffee berries regularly from side to side, yet when the fire beneath it was irregular, the berries were necessarily irregularly roasted, unless some motion could be given to the cylinder to throw the berries as well from end to end

as from side to side. A cylinder not being easily capable of such a motion, W. Law tried if it was possible to keep a long fire beneath a cylinder, at such an equal temperature as to avoid completely all irregularity in roasting, but he found this barely possible. He then thought of Mahommed's method of moving mountains, and tried if it were possible to bring the coffee regularly to the fire, since it was not possible to keep the fire regularly beneath every part of the coffee, and the only figure which appeared to him capable of doing this was the Globe. The double rotatory motion, which it cost him some toil to produce, is new, so far as he is able to learn. He has examined most machines of the kind in Scotland, England, and France. The advantages of it may be easily shown in the roasting of coffee, malt, pease, or even in the drying of corn; in all which, regularity, or sameness of colour, and, consequently, perfection of flavour, is of the utmost importance.

The manner of heating it through a cast metal pot is not a matter of indifference. Cylinders for roasting the above-named substances are generally heated above a live-coal fire of coke or charcoal, having their contents exposed to sulphurous flames, &c. &c.; but the contents of the globe is completely excluded from the fumes of fuel of any kind, and there fuel, at half the expense, will roast coffee through the pot, to what would roast the same quantity in a cylinder working on an open chauffer. But the most decided advantage is, the regular manner in which the contents of the double rotatory globe is heated, no matter what side, end, bottom, or top, the heat comes from, the constant complex motion turns every part of the machine in regular rotation against it, and while the stuff inside keeps tumbling from east to west, and from south to north, at one and the same time, it is next to impossible to make one bean one colour, and another a different colour.

W. Law has four of these machines in constant operation, driven with a steam-engine. They contain from 56 to 112 pounds each. He has now used them a sufficient length of time to prove their utility—he need not say beyond dispute—for he can have no interest, and has no wish, to dispute the point. Their pretty general adoption confirms the correctness of his conclusions while the invention was but in theory; and in submitting this model to the Society of Arts, he seeks no encouragement further than that, if they see meet to consider it a useful,—a—any invention at all—they will merely acknowledge it to be such, thus recording his claim to a trifle, which he has taken no pains otherwise to protect.

WILLIAM LAW,
EDINBURGH, 10th December, 1829.

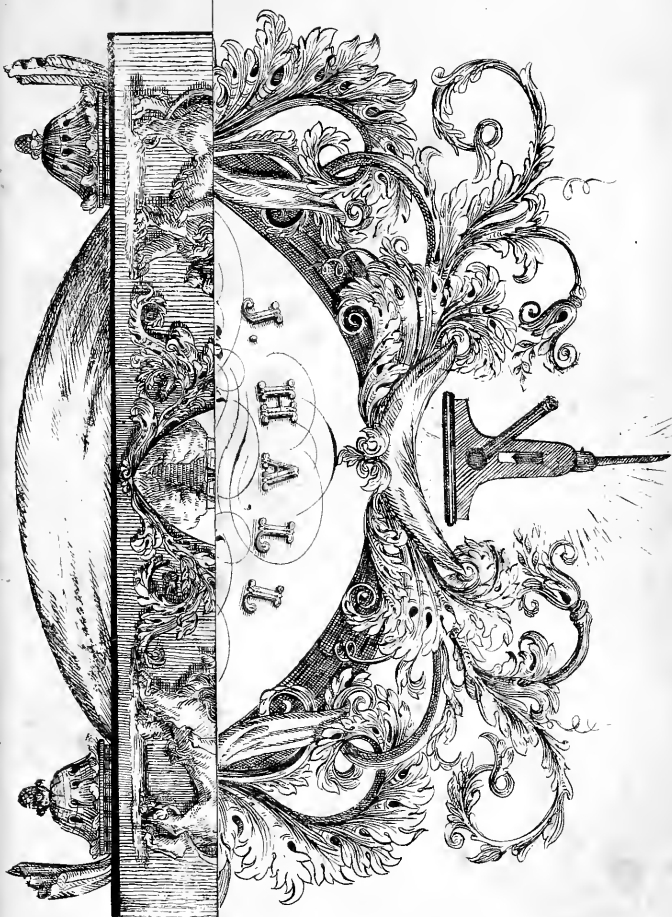

THE REPORT.—SOCIETY OF ARTS FOR SCOTLAND.

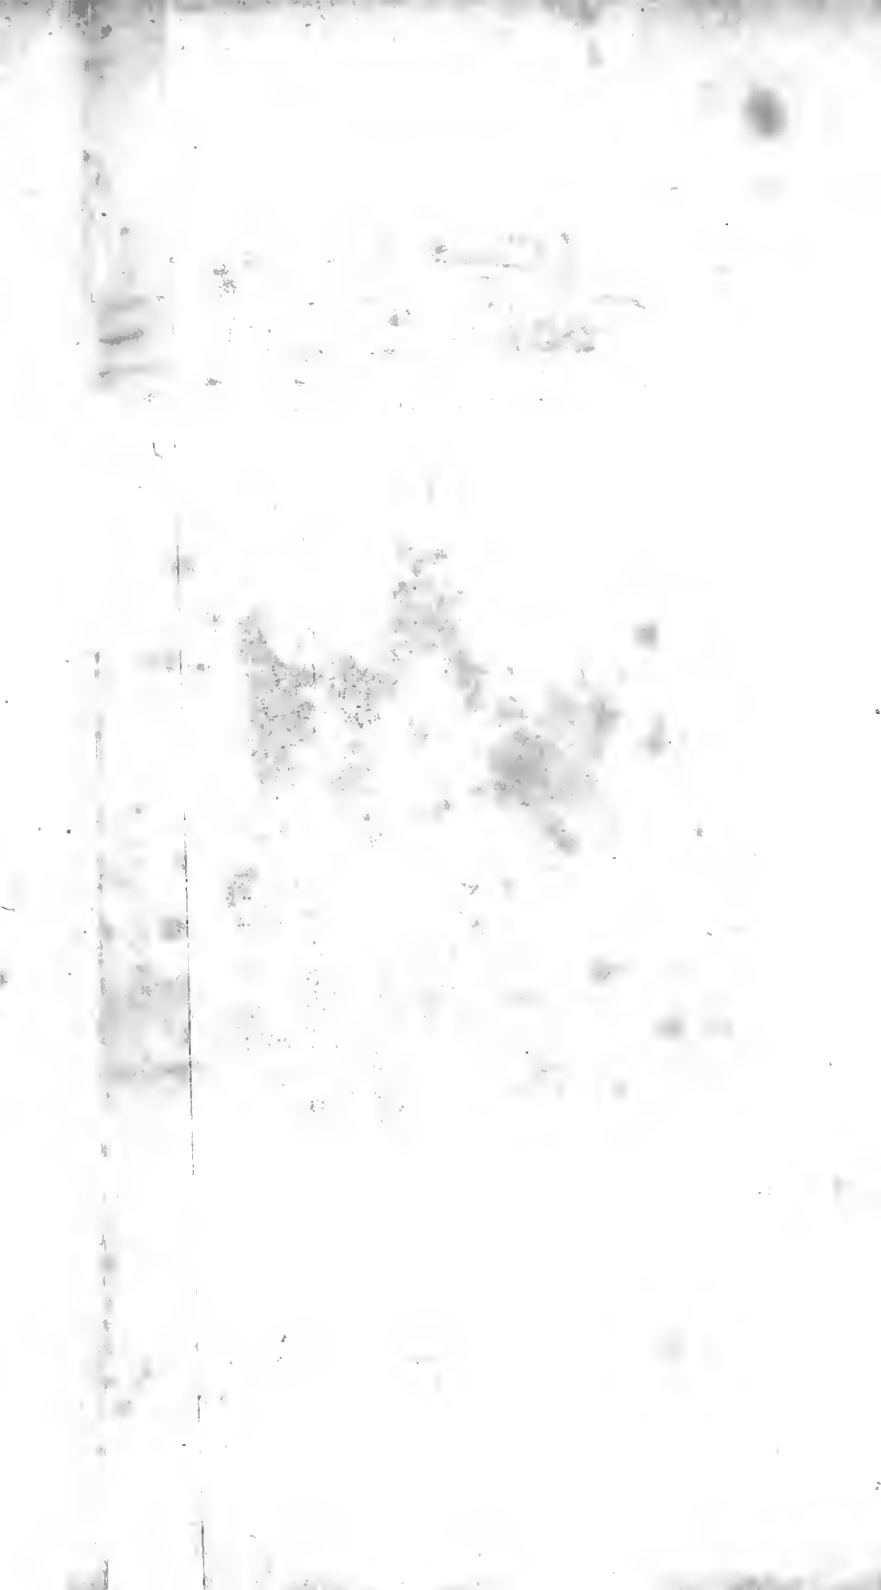

Report of the Committee appointed to examine Mr Law's Model of a New Coffee-roaster, 3d March, 1830.

The Committee have examined the Model of Mr Law's Coffee-roaster, the slightest inspection of which induces the conviction of its answering the anticipations of its inventor. The method adopted to produce two simultaneous rotatory motions, the one at right angles to the other, is very ingenious; the merit of which is enhanced by its simplicity.

The Committee have also visited Mr Law's premises, where the Machinery for Roasting and Grinding of Coffee is kept in motion by a small and handsome Steam-Engine; and they are confirmed in their opinion of the perfect efficacy of the contrivance.

The ease with which the Roaster is raised from the furnace, and the way in which the state of the Coffee may be ascertained, while the motion of the globe is maintained in one direction, have given the Committee great satisfaction.
